

BehaviorPlus[™] mobile

Behavior monitoring solutions at your fingertips.

Public Consulting Group (PCG), a leading innovator of social service and educational technology, now offers the BehaviorPlus[™] mobile personal digital assistant (PDA) – a unique handheld technology that can be used anywhere for recording and tracking child or youth behavioral episodes, interventions, and positive behavior information.

BehaviorPlus™ mobile

Behavior monitoring solutions at your fingertips.

With BehaviorPlus™ mobile, residential or in-home staff can easily capture accurate data about behavioral events from any location, immediately after the event occurs. The user can record which child or youth exhibited the behavior, type of behavior, duration of the episode, and attempted interventions to bring the child or youth back to an acceptable range of behavior. Outcomes of these interventions are then instantly available to determine progress towards goals.

FEATURES:

- Hand-held device with cradle for instant uploads to the Internet, where staff can view charts and graphs;
- Easy touch-screen navigation for real-time recording of events;
- Customized screen designs to reflect the child or youth's specific needs;
- Device displays proactive strategies to increase positive behaviors.

BehaviorPlus™ mobile allows staff to quickly track and analyze child or youth behavior events from any location and can reveal patterns of a child's behavior over time.

BENEFITS:

- Allows for quick, real-time data entry to promote accurate recording of child behavior while minimizing staff distraction from managing other children;
- Gives staff an at-a-glance, individualized behavioral profile of potential triggers and solutions;
- Supports intervention coordination with case planning colleagues and family members working to reinforce behaviors for a child or youth;
- Facilitates easy information sharing about incidents and behaviors among direct care staff or in-home providers.
- Allows clinical or supervisory staff to create Antecedent-Behavior-Consequence reports or management reports with summary level graphs;
- Reduces time needed to create paper documents, including incident reports and progress notes;
- Provides longitudinal analysis of patterns in behavior and the effectiveness of the interventions.

Contact PCG today for a demonstration of the BehaviorPlus™ mobile PDA.
